

MARC JOSHUA B. RAMOS

AI Engineer & IT Lead

marcjoshua1019@gmail.com | +63 928 168 0256 | Mandaluyong City, Philippines
linkedin.com/in/marc-joshua-ramos-943242311 | github.com/Dioswoah | portfolio-v1-two-ebon.vercel.app

AI engineer and IT lead who was shipping software for paying clients in 2023, a year before graduating Magna Cum Laude in Computer Science. Joined an outsourcing company as one of its first hires and grew the role fast, from writing AI automations to standing up the whole in-house IT department and leading a team of 5 engineers. Builds the voice agents, chatbots, and automations that real businesses run on, and is just as comfortable with the phone systems, networks, and cloud behind them. Has shipped full-stack web and mobile apps and worked across food retail, fire protection, and real estate, picking up new stacks and industries faster than most.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, C#, C, Java, PHP, SQL, HTML, CSS

Frameworks, Web & Mobile: Node.js, React, Next.js, MERN, Laravel, WordPress, Android (Java, Android Studio), Flutter

Databases & Backend: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Pinecone (vector)

AI & Agents: Model Context Protocol (MCP), LangChain, LangGraph, CrewAI, RAG, Claude Agents, Google ADK, OpenClaw, Hermes Agent

AI Platforms & Voice: Vertex AI, Gemini, AWS Bedrock, Azure AI Foundry, Vapi, Twilio, ElevenLabs, HeyGen, Higgsfield, Botpress, FlowiseAI

DevOps, Automation & Cloud: Docker, Vercel, n8n, Make.com, GCP (Cloud Run, Cloud SQL, Vertex AI), AWS (S3), Data Migration

Business & Collaboration: Xero, Simpro, Google Workspace (Admin), Zoho, Slack, MS Teams

Telephony & Networking: Vonex, ViciDial, Cisco VoIP, Cisco Meraki, UniFi, MikroTik

Machine Learning & CV: YOLOv5, ResNet50, Scikit-Learn, Computer Vision

PROFESSIONAL EXPERIENCE

AI Engineer, Offshore Outsource Operations Inc. (Outsourcing / BPO) · Pasig City (On-site)

Sep 2025 – Present

- One of the company's pioneer hires: built and now manage the in-house IT department from the ground up, covering systems, infrastructure, accounts, and day-to-day technical support
- Lead a team of 5 AI engineers building production automations, autonomous agents, and voice systems for the business
- Build the voice agents, chatbots, and automation workflows behind a fire protection company's operations with Vapi, ElevenLabs, n8n, and Make.com
- Integrate finance and field-service platforms (Xero, Simpro), Google Workspace, and phone systems (Vonex, ViciDial) into those workflows
- Led a multi-terabyte data migration from Zoho to Google Workspace, writing custom console applications to move enterprise records across cloud environments without data loss
- Deploy autonomous agents and chatbots on GCP Vertex AI using Claude Agents and Model Context Protocol (MCP), through the OpenClaw and Hermes frameworks
- Produce AI-generated video and image content for social media using HeyGen and Higgsfield

Technologies: *Python, Vapi, ElevenLabs, Botpress, FlowiseAI, n8n, Make.com, GCP (Vertex AI, Cloud Run, Cloud SQL), Claude Agents, CrewAI, MCP, Xero, Simpro, Vonex, ViciDial*

Junior Software Engineer, RealVantage · Singapore (Remote)

Jan 2025 – Dec 2025

- Built and shipped a website RAG chatbot backed by a proprietary LLM for a real estate investment platform, giving visitors instant answers pulled from company content
- Built Slack bots and apps wired to a deployed AI agent that surfaced and handled the team's deals information
- Owned back-end features for an international remote team, profiling the codebase to find bottlenecks and automate repetitive internal engineering tasks
- Replaced manual steps with custom internal tooling, which trimmed overhead and shortened deployment cycles

Technologies: *Python, RAG, LLMs, React, MongoDB, Slack, MS Teams, Agile*

Software Engineer Intern, Motolite (Ramcar Group of Companies) · Philippines (Hybrid)

Aug 2024 – Dec 2024

- Built internal automation for the Ramcar Group's food brands (KFC, Tokyo Tokyo, Mister Donut), deploying on AWS with Bedrock and S3
- Wrote a Python-based Cisco Meraki alerting script that pushed real-time network alerts to Gmail, helping IT catch issues sooner
- Built an internal IT self-help portal so employees could resolve common problems without filing a ticket
- Contributed to full-stack Python applications and standardized kiosk and OS configurations across company devices to cut setup time

Technologies: *Python, AWS (Bedrock, S3), Cisco Meraki, Gmail API, Windows OS***PROJECTS & RESEARCH**

Medicinal Leaf Recognition (YOLOv5) · Machine Learning Researcher, Mapúa University

Apr – Oct 2024

- Trained a YOLOv5 model with a ResNet50 backbone to classify Philippine medicinal leaves, handling data labeling, preprocessing, and inference tuning
- Published the results at the 2024 International Conference on Education, Business, and Technology (ICEBT)

Barangay Batis Information Repository · Sole Developer (Freelance)

Feb – May 2024

- Built a centralized web records system in PHP and phpMyAdmin as sole architect, developer, and deployer
- Replaced the local government unit's paper-based tracking of public inquiries with a faster, searchable digital system

Arabit Pharmacy Mobile Ordering App · Freelance Developer

Aug – Dec 2023

- Built a native Android app in Android Studio with Firebase, letting customers browse medicines and place orders from their phones
- Delivered the full product catalog, cart, and checkout flow solo, from first build through handoff to the client

CryptoGuard: Decrypting the Tactics of KandyKorn · Publication

2024

- Co-authored a technical analysis of the KandyKorn macOS malware, presented at ICEBT 2024

CERTIFICATIONS

Coursera Certifications (software development and AI foundations)

EDUCATION

B.S. Computer Science, Application Development · Mapúa University

Graduated Jan 2025

Magna Cum Laude · Dean's Lister and Academic Scholar (Years 1–4)

Senior High School (ICT) · STI College, Sta. Mesa

2021

Valedictorian, Top 1 Overall (Batch 2020–2021) · 3rd Placer, All-Level Codefest
